

15 OCT 1958

MEMORANDUM FOR: Assistant to the DD/I Planning

SUBJECT : DD/I Requirements for Communications

REFERENCE : 10-7367, dated 24 September 1958

1. It is requested that the communications requirements of the DD/I as set forth in the draft reference be expanded as indicated below:

A. Washington Dissemination Net

Include block diagram showing location of each station in the Net.

B. Washington Area Coordination Net

Include block diagram showing location of each station in the Net. If equipment should be terminated at a different office in the same location as a station in the Dissemination Net, this should be indicated.

C. High Precedence Communications Net

The present overseas network as established, basically meets the requirement of station location. It is necessary that specific stations, needing the high precedence capability be listed.

D. High Volume Communications Net

As in "C" it is necessary that specific stations, needing the capability of high volume traffic handling, be listed.

2. It is necessary to have a listing of local stations to which a facsimile or compatible system is needed.

3. In all instances, when applicable, it would be most helpful if it could be indicated on which of the circuits special intelligence material would be a portion or all of the traffic.

4. It is requested that your final memorandum be forwarded to the Office of Communications through the Deputy Director (Support).
